ABOUT ME

Motivated and skilled front-end developer proficient in JavaScript, ReactJS, Next.js, and version control with Git and GitHub. Eager to apply technical expertise to real-world projects

SKILLS

Programming Languages

- JavaScript (Advanced)
- Python (Intermediate)
- HTML5 CSS (Proficient)

Framework/Libraries

- Tailwindcss (Intermediate)
- Bootstrap (Intermediate)
- ReactJS, Next.js (Profecient)

Other Technologies

- Git GitHub (Advanced),
- VS Code (Advanced),
- Chrome Dev Tools, MongoDB, Firebase

PROJECTS

E-commerce app

USED- ReactJS, Bootstrap, Firebase

Built an e-commerce website using ReactJS with user authentication, store, cart, and contact pages, featuring real-time cart updates. Employed lazy loading for performance, Context API for state management, and React Router for navigation. **website link-** <https://fir-hosting-2fdad.web.app/Store>

Mail-box client app

USED- ReactJS, Redux, TailwindCSS, Firebase

Developed a robust Mailbox Client App using ReactJS, featuring user authentication using firebase, composing, sent, and inbox email pages. Leveraged Redux for state management, TailwindCSS for styling, and React Router for navigation. **github link-** https://github.com/codebyayush/08_mailbox_client_md

To-do List app

USED- Next.js, TailwindCSS, MongoDB

Created a dynamic To-Do List App using Next.js, enabling users to add, complete, incomplete, and delete tasks with data stored in MongoDB. Utilized Context API for state management and TailwindCSS for styling.
